

SOFTWARE - SYNERGI™ LIFE

SAFETY FIRST

Customer story - Hess Corporation

Hess Corporation understands the importance of responsible Environment, Health and Safety (EH&S) management to growth, profitability and long term success. That's why they chose Synergi Life.

Benefits for Hess Corporation

- Synergi Life provides a configurable and user-friendly platform for a global EH&S management solution
- Synergi Life provides Hess with EH&S data in a much more timely and effective fashion
- Synergi Life makes measuring of risk factors possible and thereby lays the ground for improvements

"Synergi Life provides us with real-time reporting of EH&S issues and the opportunity to learn from each other. Additionally, Synergi Life provides us with a consistent action tracking and reporting tool that supports continuous improvement. These factors are important aspects of a growing business."

Kurt Krieter, former Vice President EH&S for Exploration and Production Hess Corporation

HESS IN BRIEF

The Hess Corporation is an American integrated oil company headquartered in New York City, and a Fortune 100 corporation. The company explores, produces, transports and refines crude oil and natural gas.

BRIEF ACCOUNT

Why we chose DNV GL - Software

- They assign specific people particularly for this job. They work continually with a dedicated team of user groups from Hess to implement and improve the system.
- DNV GL is perceived as extremely responsive and reliable. Synergi Life is Hess Exploration and Production's first EH&S Incident Management System to be implemented as a global solution.

This is what we gained:

- Through common terminology and rules applied internationally, the principle of reporting and sharing knowledge is facilitated. Any end user in Hess can easily look up a case in any part of the world at any given time without any special report needed.
