# NAVIGATOR WORK & REST

The Navigator Work & Rest module is a practical tool for registering planned and executed work hours. It calculates rest hours and automatically checks compliance with international and national legislation. Hours and remarks may alternatively be registered on a server or stand-alone computers. The Navigator Shore portal allows for office monitoring of work & rest non-compliance.

### Purpose

Navigator Work & Rest provides a cost-effective way of demonstrating compliance with relevant international and national legislation on seafarers' work & rest hours.

### Features

The module demonstrates compliance with the:

- Maritime Labour Convention 2006
- ILO Convention (No. 180) concerning Seafarers' Hours of Work and the Manning of Ships
- STCW - 95 (Standard of Training, Certification and Watch-keeping for Seafarers) incl. Manila amendments 2010
- US OPA 90 (Oil Pollution Act of 1990)
- OCIMF's Guidelines governing Seafarers' Hours of Work & Rest

Any violation of rules and regulations is clearly identified and marked.

The system allows user-defined:

- Reporting periods
- Remarks on violations of rules and regulations
- Types of regular work and overtime

### Reporting and recording

- Daily/monthly summary reports of complete crew hours and flagging of violations of rules to vessel and fleet
- Practical printouts in the official IMO/ILO format
- The system allows the registration and reporting of regular work and overtime
- Records can be locked once they are archived and synchronized
- Individual and summary reports can easily be exported to the Navigator Shore portal for fleet monitoring

### Benefits

- Highlights compliance with relevant international and national legislation on seafarers' rest hours
- The system is kept compliant with the latest maritime legislation at any time
- Can be installed on a server or stand-alone computers
- Office monitoring of work & rest non-compliance.
