SYNERGI PIPELINE SIMULATOR (SPS) ADVANCED

Course code: SY-46
Duration: 3.5 days

Prerequisite:

Previous knowledge of Synergi Pipeline Simulator is required, which could be from experience or from having taken the SY-45 Synergi Pipeline Simulator standard course within the last six months.

Some knowledge of pipeline operations and pipeline hydraulics is highly recommended.

DESCRIPTION

The training course covers various Synergi Pipeline Simulator advanced topics including, but not limited to:

- Surge analysis
- Advanced control systems
- DRA modelling
- Advanced workflows

The training will include formal presentation materials and workshops, as well as open discussions involving all participants.

LEARNING OBJECTIVES

Each Synergi Pipeline Simulator advanced course is different and custom-tailored to questions and topics submitted by participants prior to each training. As a result of the custom nature of this course, class size is limited to a maximum of 10 students.

TARGET GROUP

Users with extensive Synergi Pipeline Simulator knowledge who are seeking to add to their existing skillset.
