

DIGITAL SOLUTIONS

SYNERGI™ LIFE

Consulting

Synergi Life is a complex and powerful tool for controlling and monitoring your overall operational risk.

To ensure that our customers get the most out of Synergi Life, we offer workshops and also provide consultancy and advisory services during implementation of new processes and procedures. This ensures that systems are implemented in Synergi Life at the same time. This could be new quality management procedures and processes, simplifying the way you handle behaviour-based safety or how you do your action management.

For a workshop or a meeting we can send a senior QHSE consultant and a technical resource to get the most out of your workshop or meeting. If any changes, adjustments or enhancements are agreed upon during the workshop, this will be written in a specification for your approval, and an offer for implementing the changes will be sent.
