

DIGITAL SOLUTIONS

SYNERGI™ LIFE

Consulting - Integrations

Integrate Synergi Life to increase your Synergi Life return on investment (ROI).

Maintaining users, vendors, locations, business units etc. can be a time-consuming task preventing both IT and QHSE staff from focusing on improvement and other important daily issues. Another common problem with multiple sources and with corresponding information is that it can cause inconsistency and poor data quality.

Using web services, Synergi Life can easily be integrated with other best practice applications to add further value to your QHSE data. Data is maintained in one system and distributed to other systems when needed, ensuring high quality and fully automated processes. The integration process can be customized to your business needs giving an optimal solution for integration with SAP, Agresso, Active Directory, in-house systems, environmental and other specialized systems.

Synergi Life - Integrations have been successfully implemented for several customers, giving Integrations solutions for users, locations, business units, content management and other industry-specific systems. This gives immediate return on investment in higher data quality and increased value.
