## Consulting - e-Form implementation

Make sure all your data is captured with e-Form.

In remote areas the telecommunication infrastructure can make it a challenge to work with distant web applications. Data may be lost due to an unreliable internet connection.

The e-Form is a simple customized input which uses e-mail to submit the information. Reporting through Synergi Life e-Form is a simple, well tested and well documented way of reporting new cases into Synergi Life.

Before implementing a new e-Form it is important to evaluate the needs and requirement for this solution. A consultant from DNV GL has experience and knowledge to assist and provide advice for the best customized e-Form implementation to cover the needs of your business.
