SYNERGI™ LIFE

Holistic QHSE and enterprise risk solutions

Your safety critical business can become a data smart organization

Do you have a complete picture of your enterprise risk?

While there is great awareness of risk in upper management, many companies still lack a complete and detailed picture of their enterprise risk portfolio. This is changing. There is an increasing understanding that organizations need to address risk quickly and demonstrate risk performance in real-time, in an accountable and transparent way. To do this, they need a dedicated risk management software solution.

What are the goals of risk managers? They are looking for a solution that will help them constantly make operations safer, while reducing cost. The solution must support learning and continuous improvement. At the same time, its state-of-the-art technology should be easy and intuitive to use, anywhere and at any time.

Globally recognized

Synergi Life is a comprehensive business solution for QHSE (quality, health, safety and environment) and risk management based on DNV GL's extensive domain expertise. The system manages all non-conformances, incidents, risk, risk analyses, audits, assessments and improvement suggestions.

It is already one of the world's most recognized QHSE software brands*, respected for its leading capabilities and superior user experience. Now, based on active customer involvement in the development, Synergi Life has become even more powerful, versatile and user-friendly. Leveraging new technologies, your organization can gain from informed real-time decisions and insight-driven learning.

Synergi Life offers a completely new user experience that will make your job easier.

Some of the highlights of Synergi Life are:

- Full cross-browser support
- Optimization for Chrome and Safari
- Dashboards with drilldown functionality
- Full case processing
- Device independency
- Improved and responsive design
- Increased usability
- Azure PaaS (platform-as-a-service) compliant

Synergi Life - a complete risk management system

Synergi Life is used by over 350 companies worldwide, with more than 750,000 users globally, across a number of industries and businesses, such as energy, healthcare, transportation, local government, construction and more. Its coverage includes:

- Incident management and reporting
